# Problem Statement

Many **young adults struggle** with finding the motivation to cook, from **finding meals** that align with their health goals and dietary restrictions to managing preparation within **time** and **budget constraints**.

**70%** of students and new graduates  
are not confident in their cooking skills

**75%**

have faced decision fatigue when  
choosing what to cook

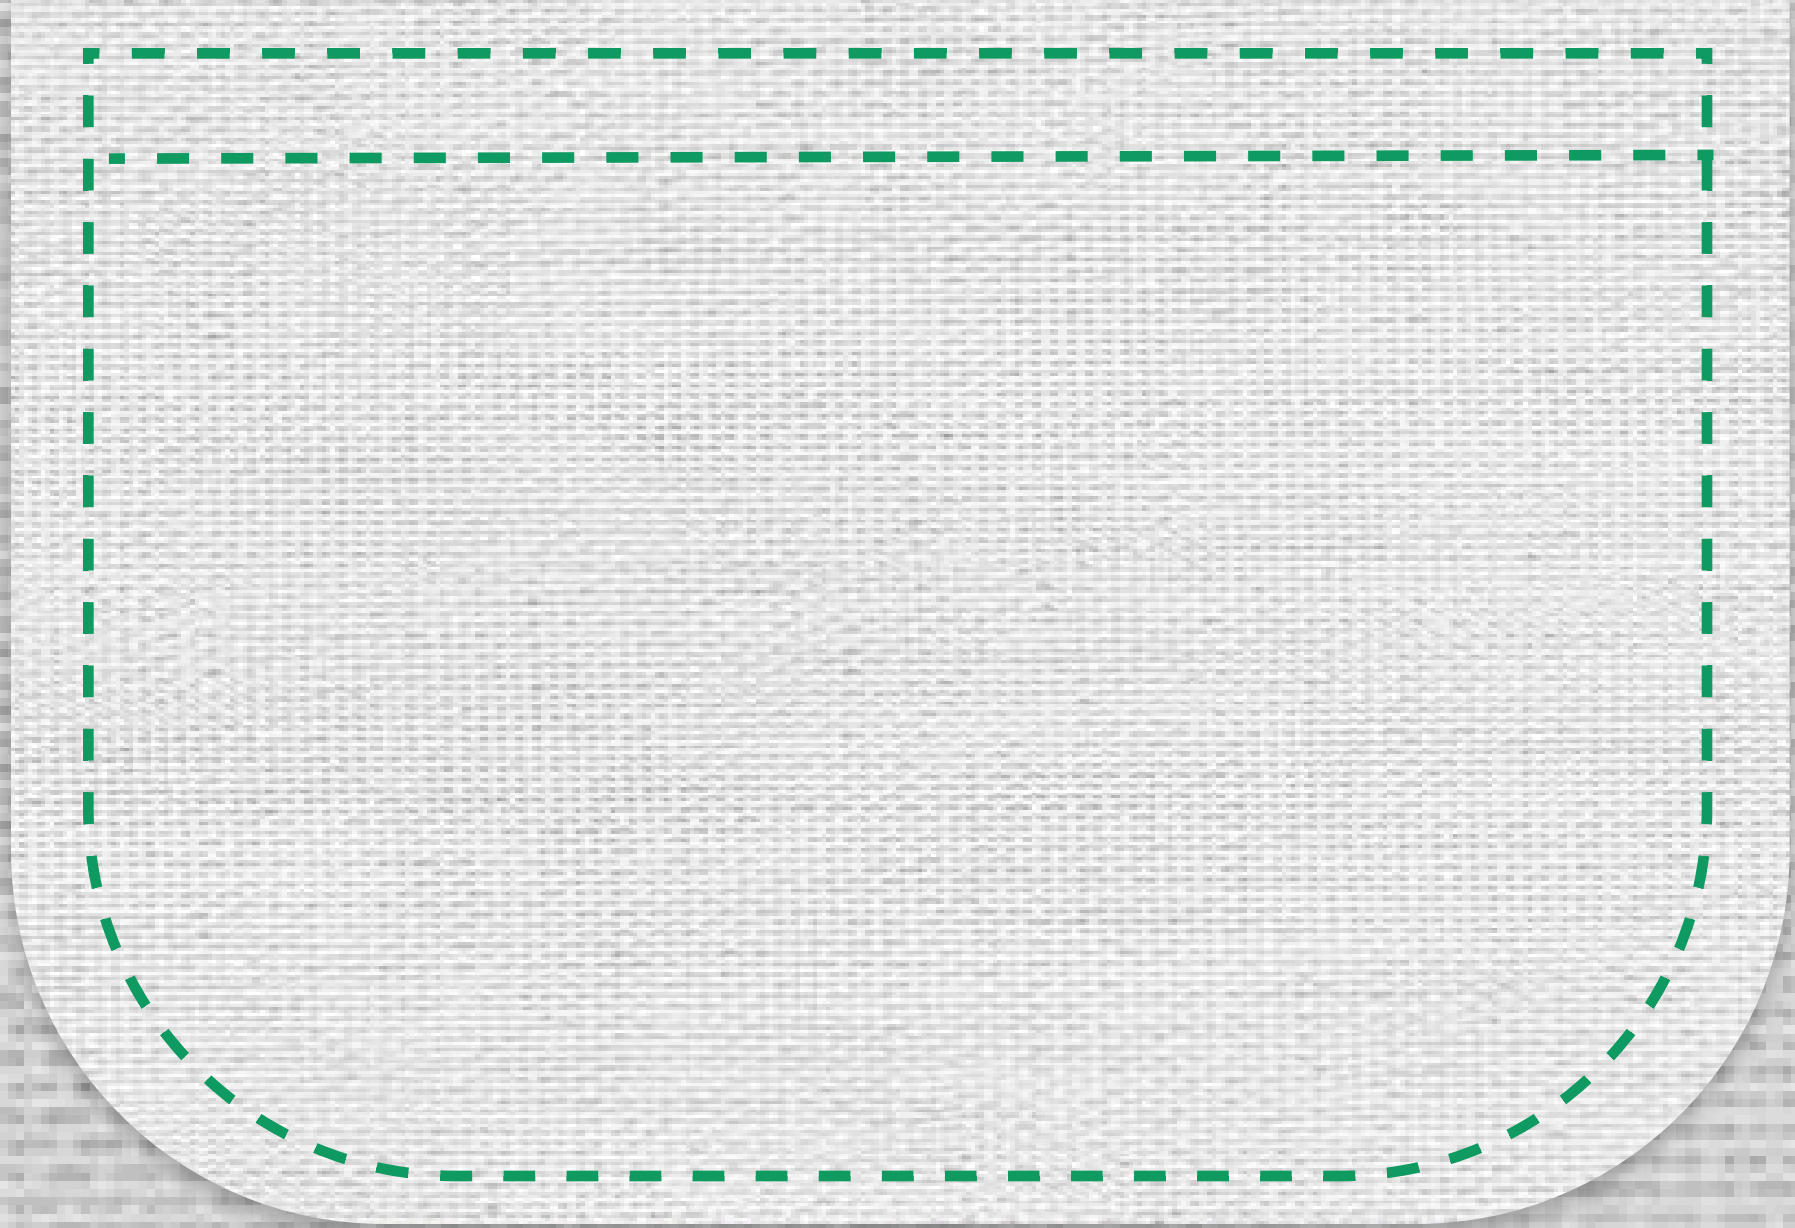

**48%**

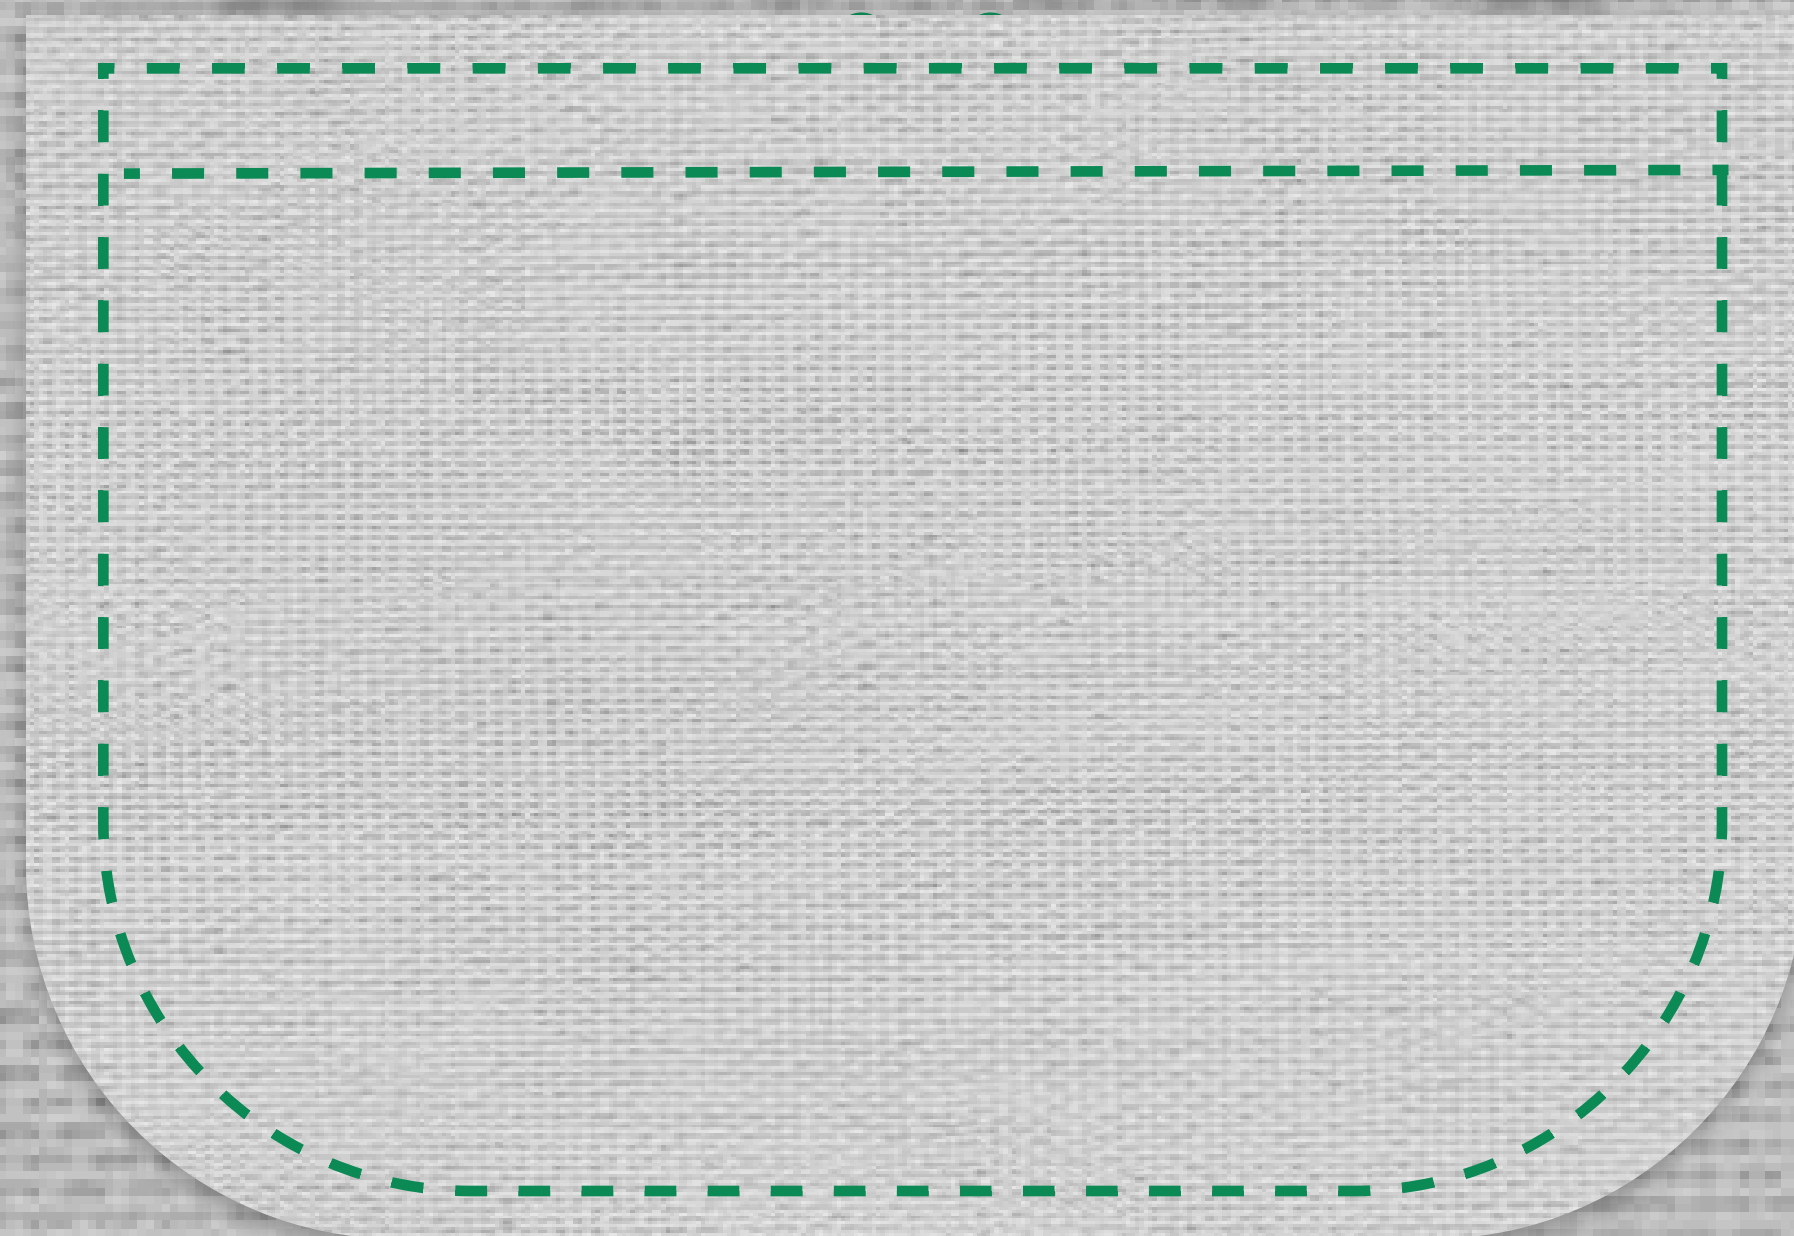

want a product that can help them  
with decision making and building  
their skills

**How can we help them?**

“

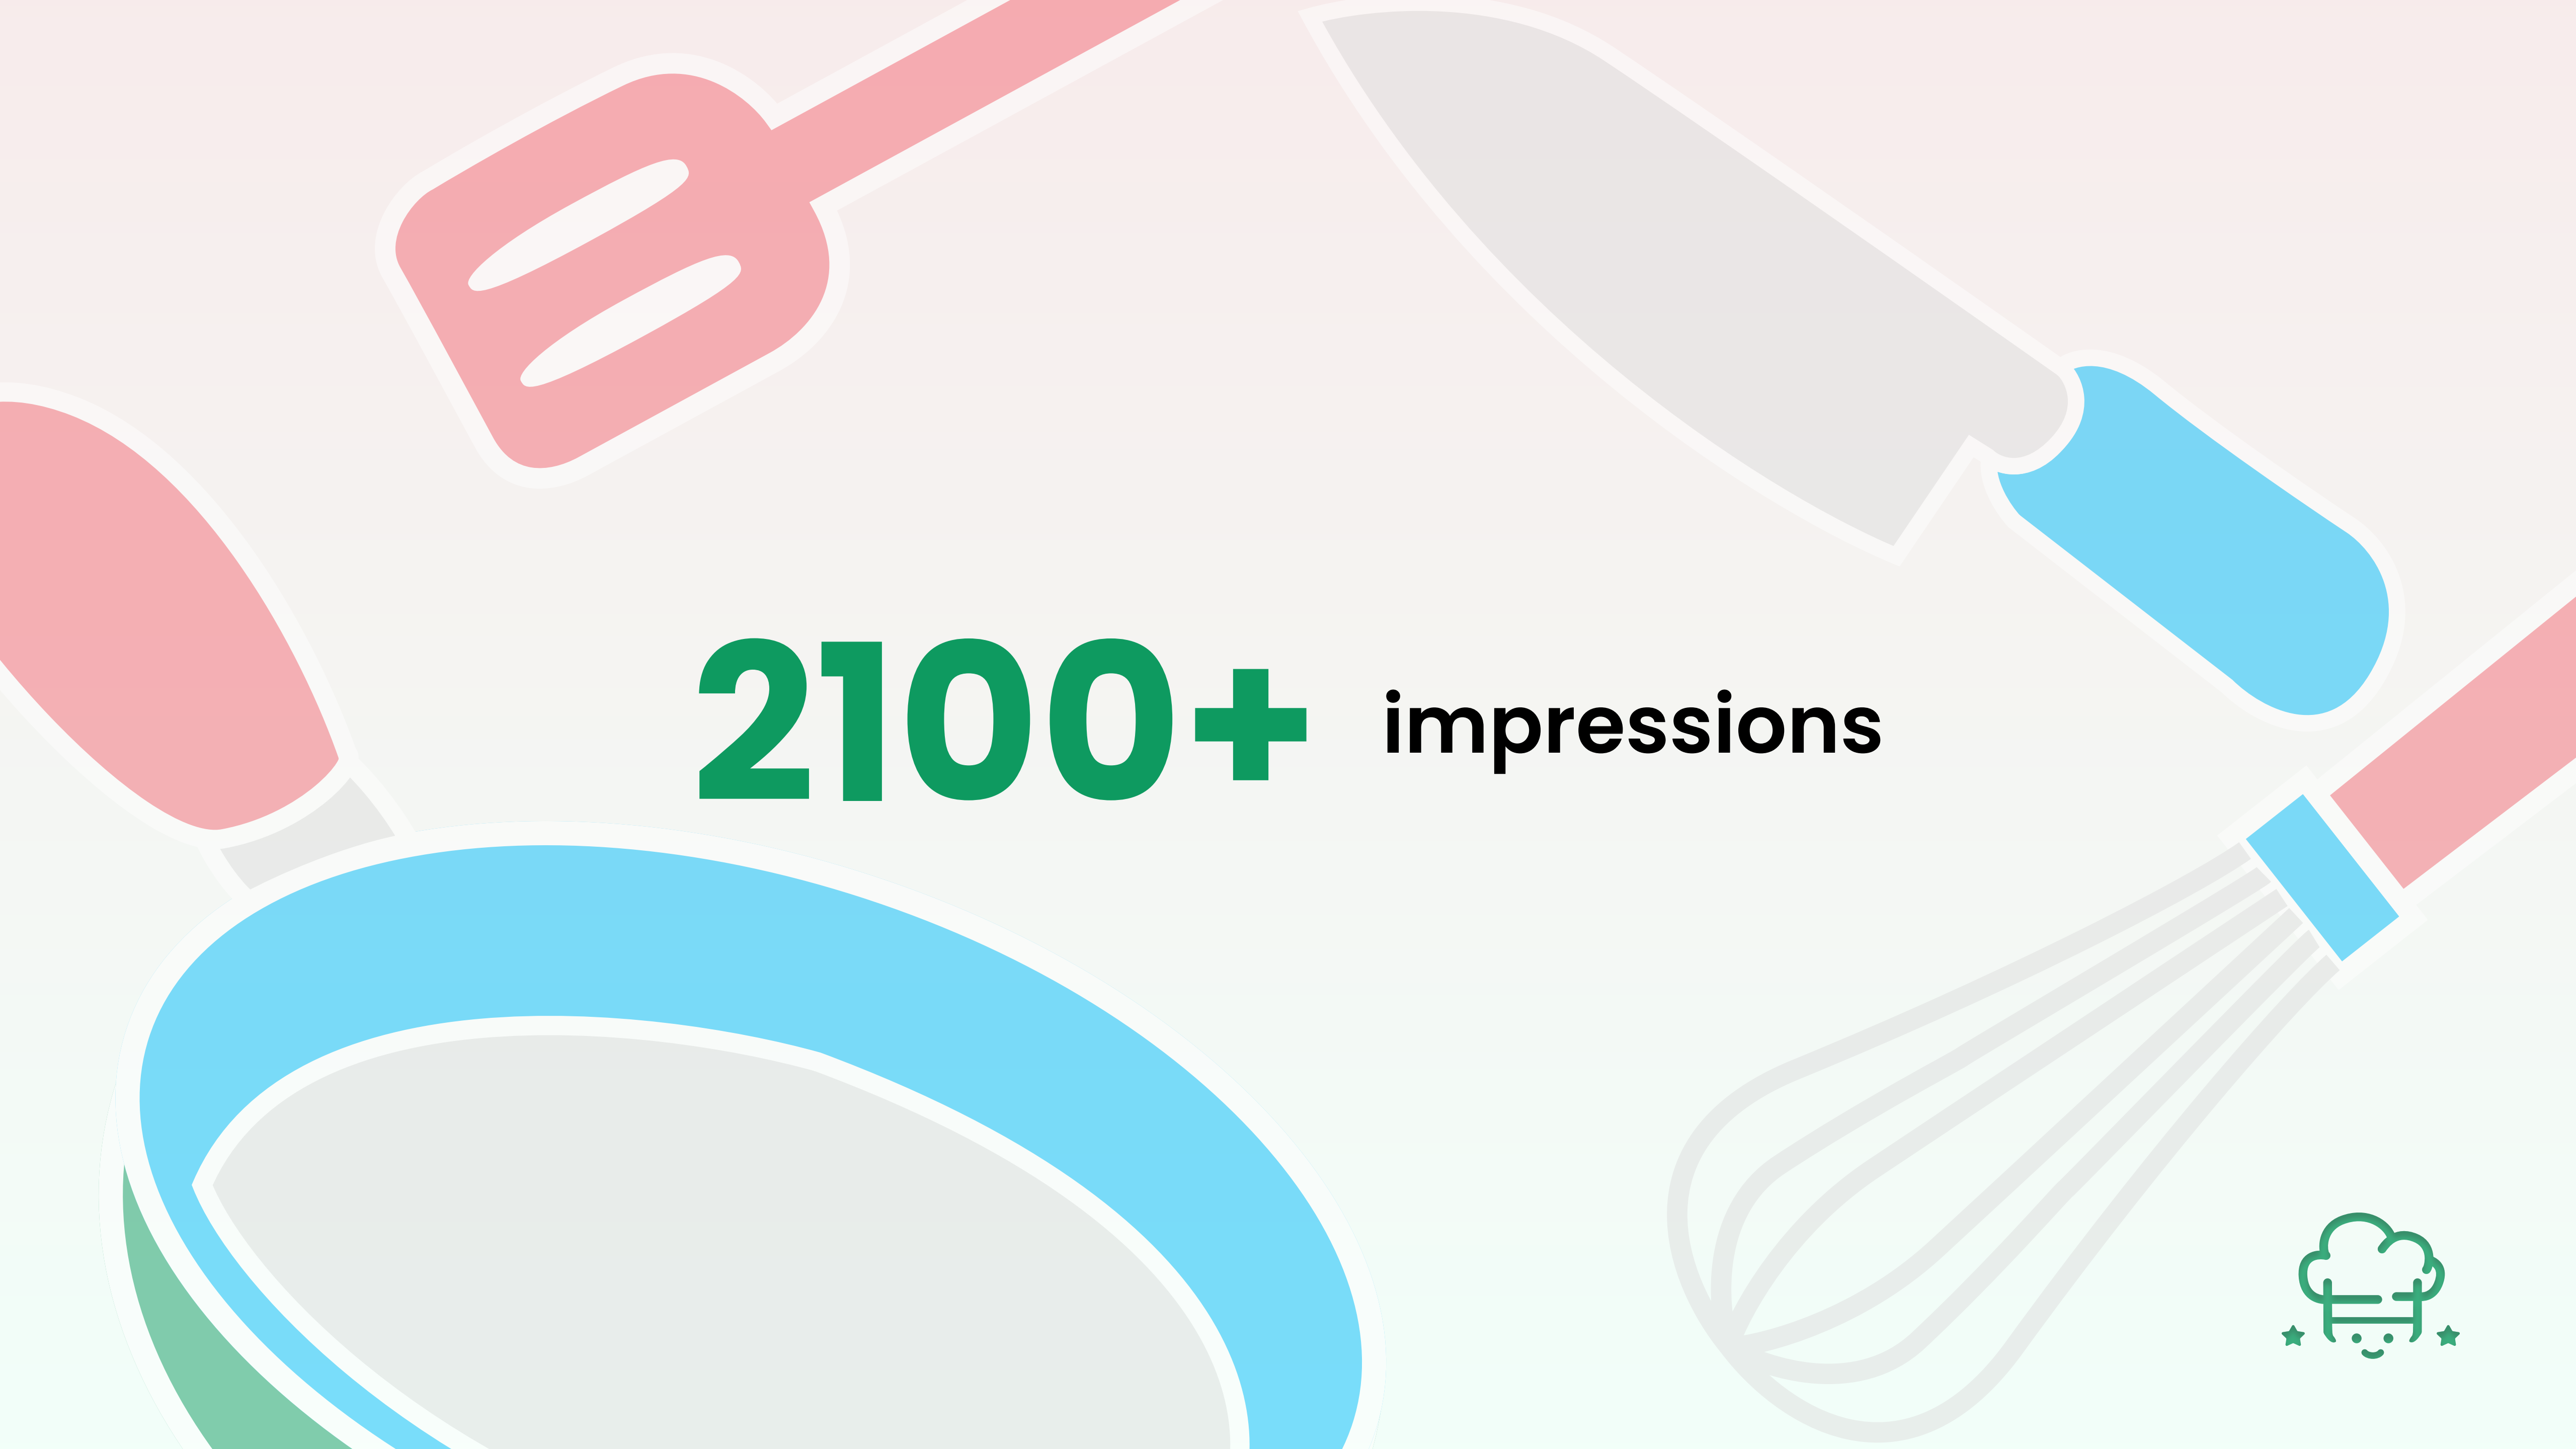

Lil'Chef has made cooking way more fun! It streamlines everything, so even as a busy student, I can actually find time to cook instead of ordering takeout. The recipes are 🔥, and it makes eating at home so much easier. 100% recommend!

**Sophia P**

Undergraduate Student at Queen's University

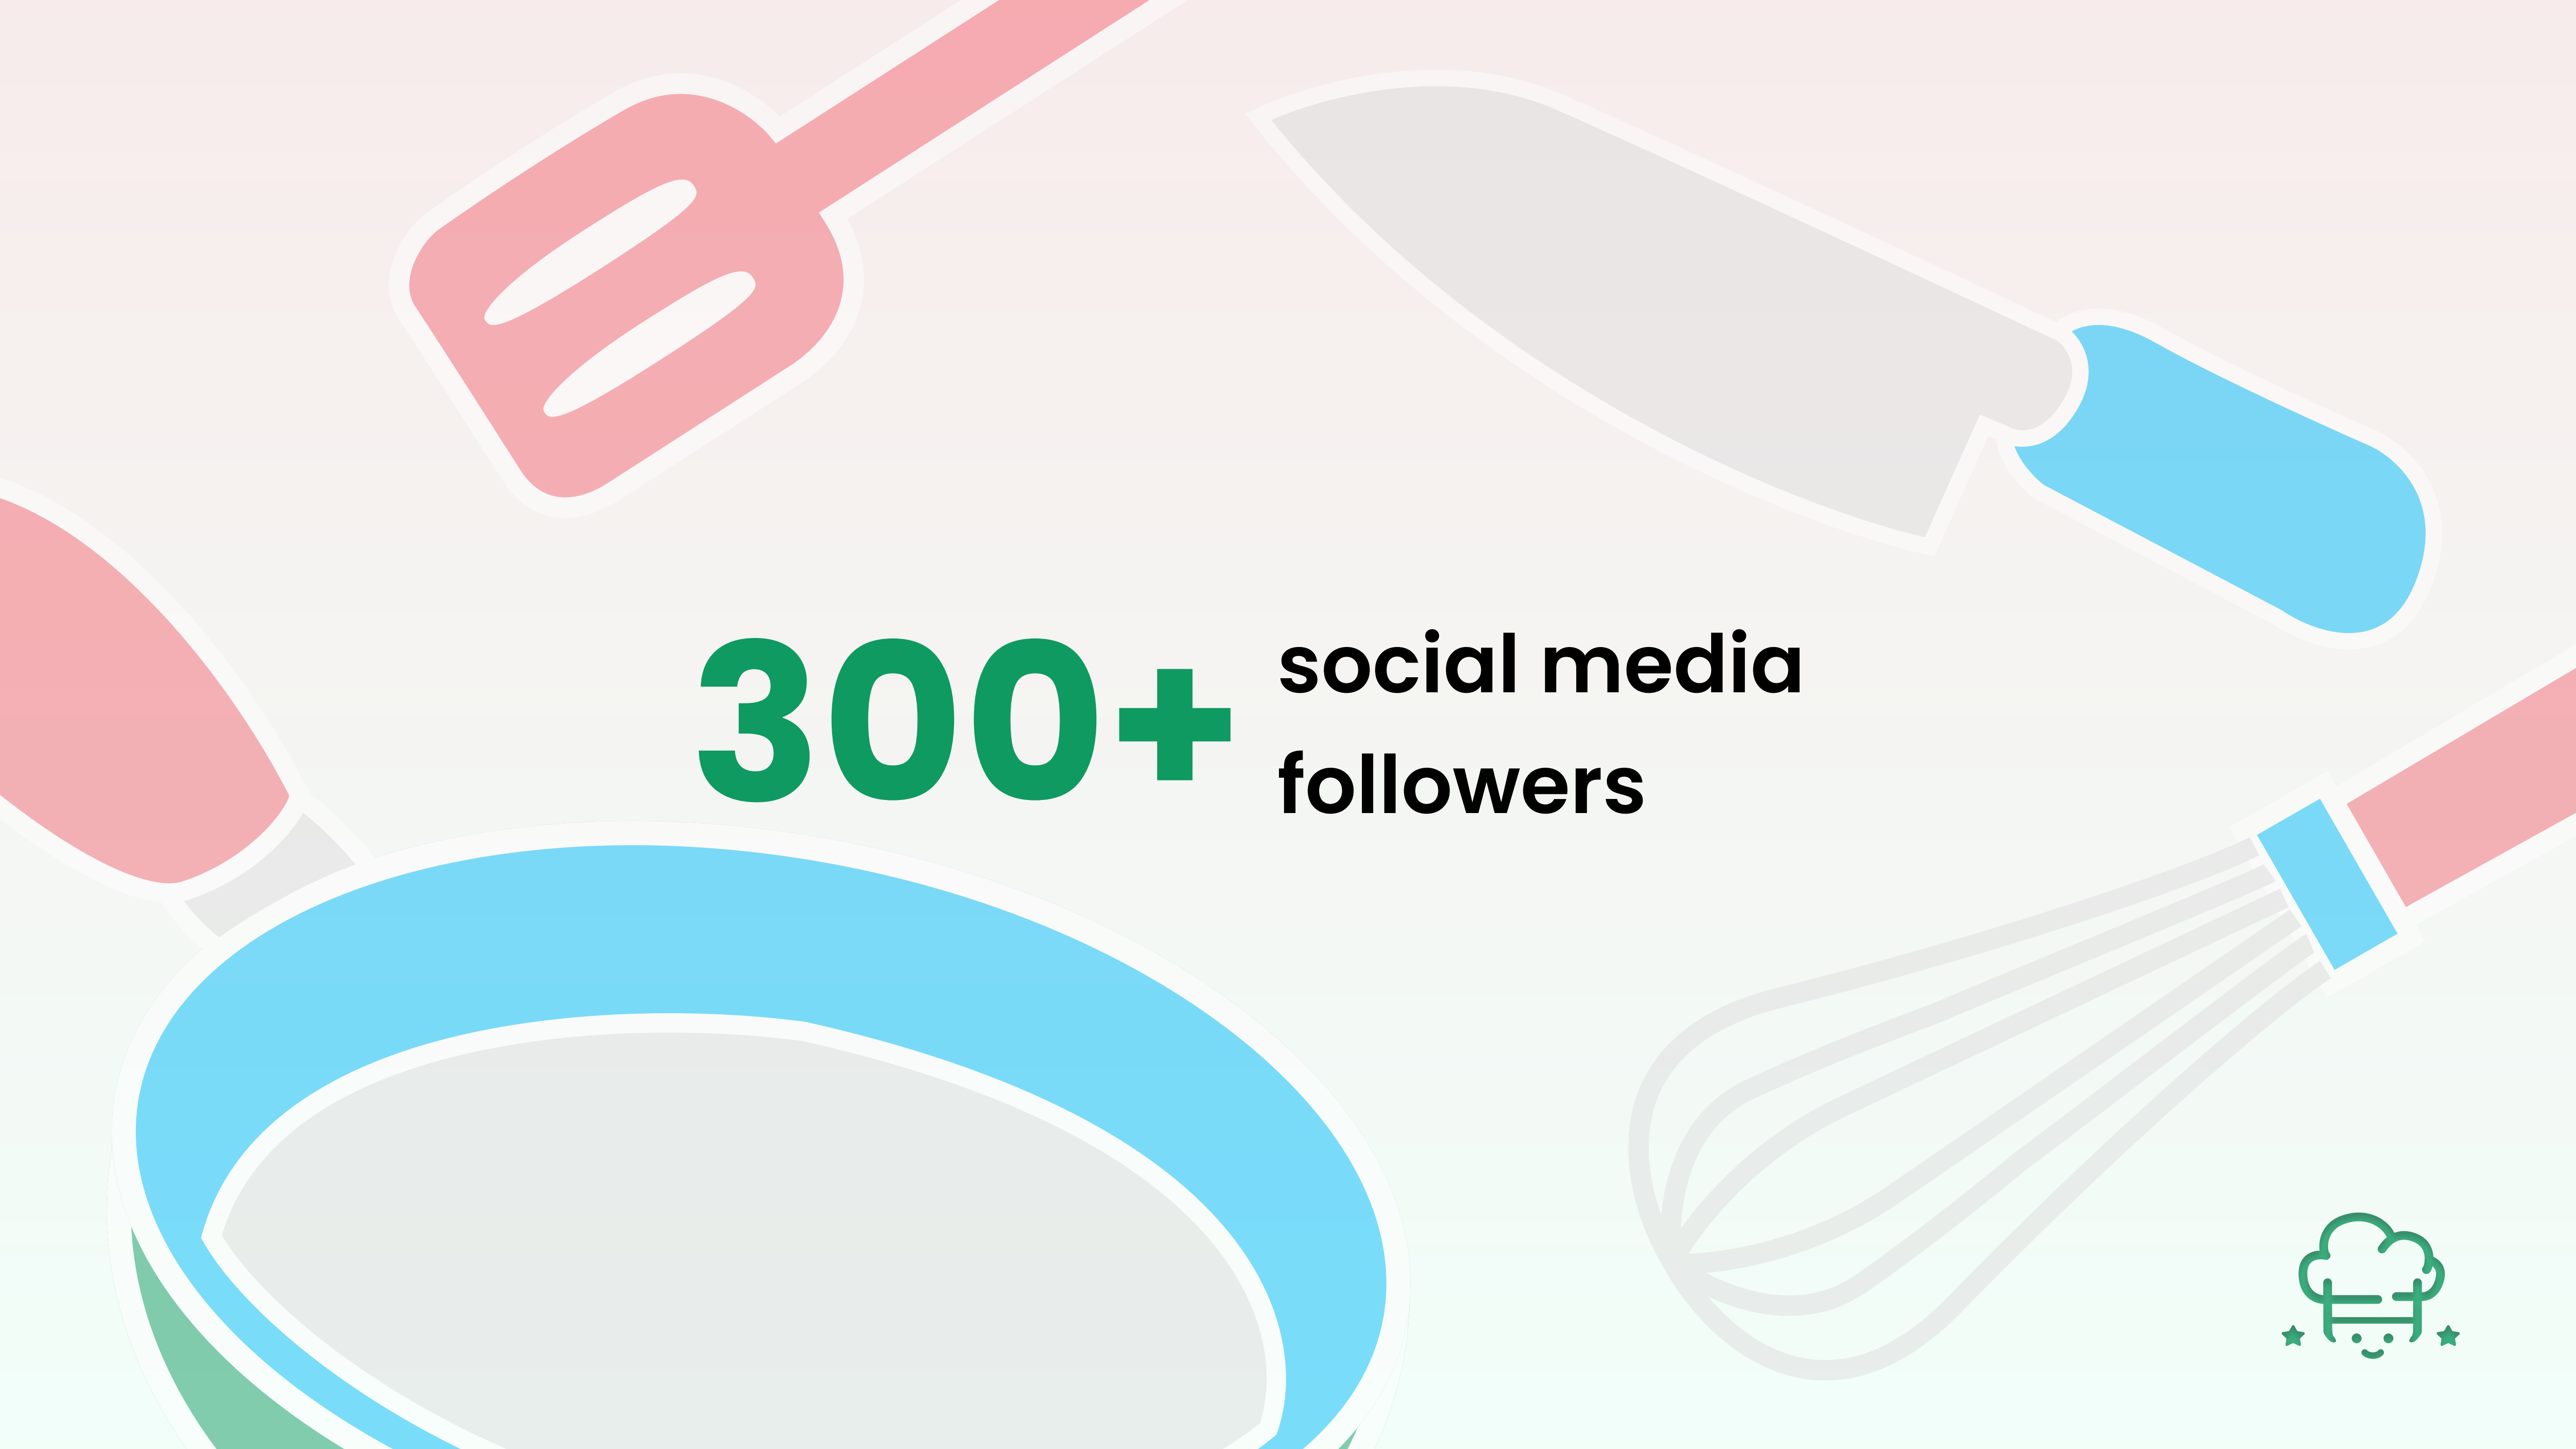

The background features several stylized kitchen utensils in a light, pastel color palette. A red spatula is in the upper left, a grey knife with a blue handle is in the upper right, a red spoon is on the left, a blue bowl is in the lower left, and a whisk with a red handle and blue band is in the lower right. The text "2100+ impressions" is centered in the middle of the image.

# Go To Market Strategy

## ☒ Step 1: Launched App to Beta Users

- Select group of users test out key features and product fit
- Iterate development from feedback
- Grow waitlist

## ☑ **Step 2: Marketing**

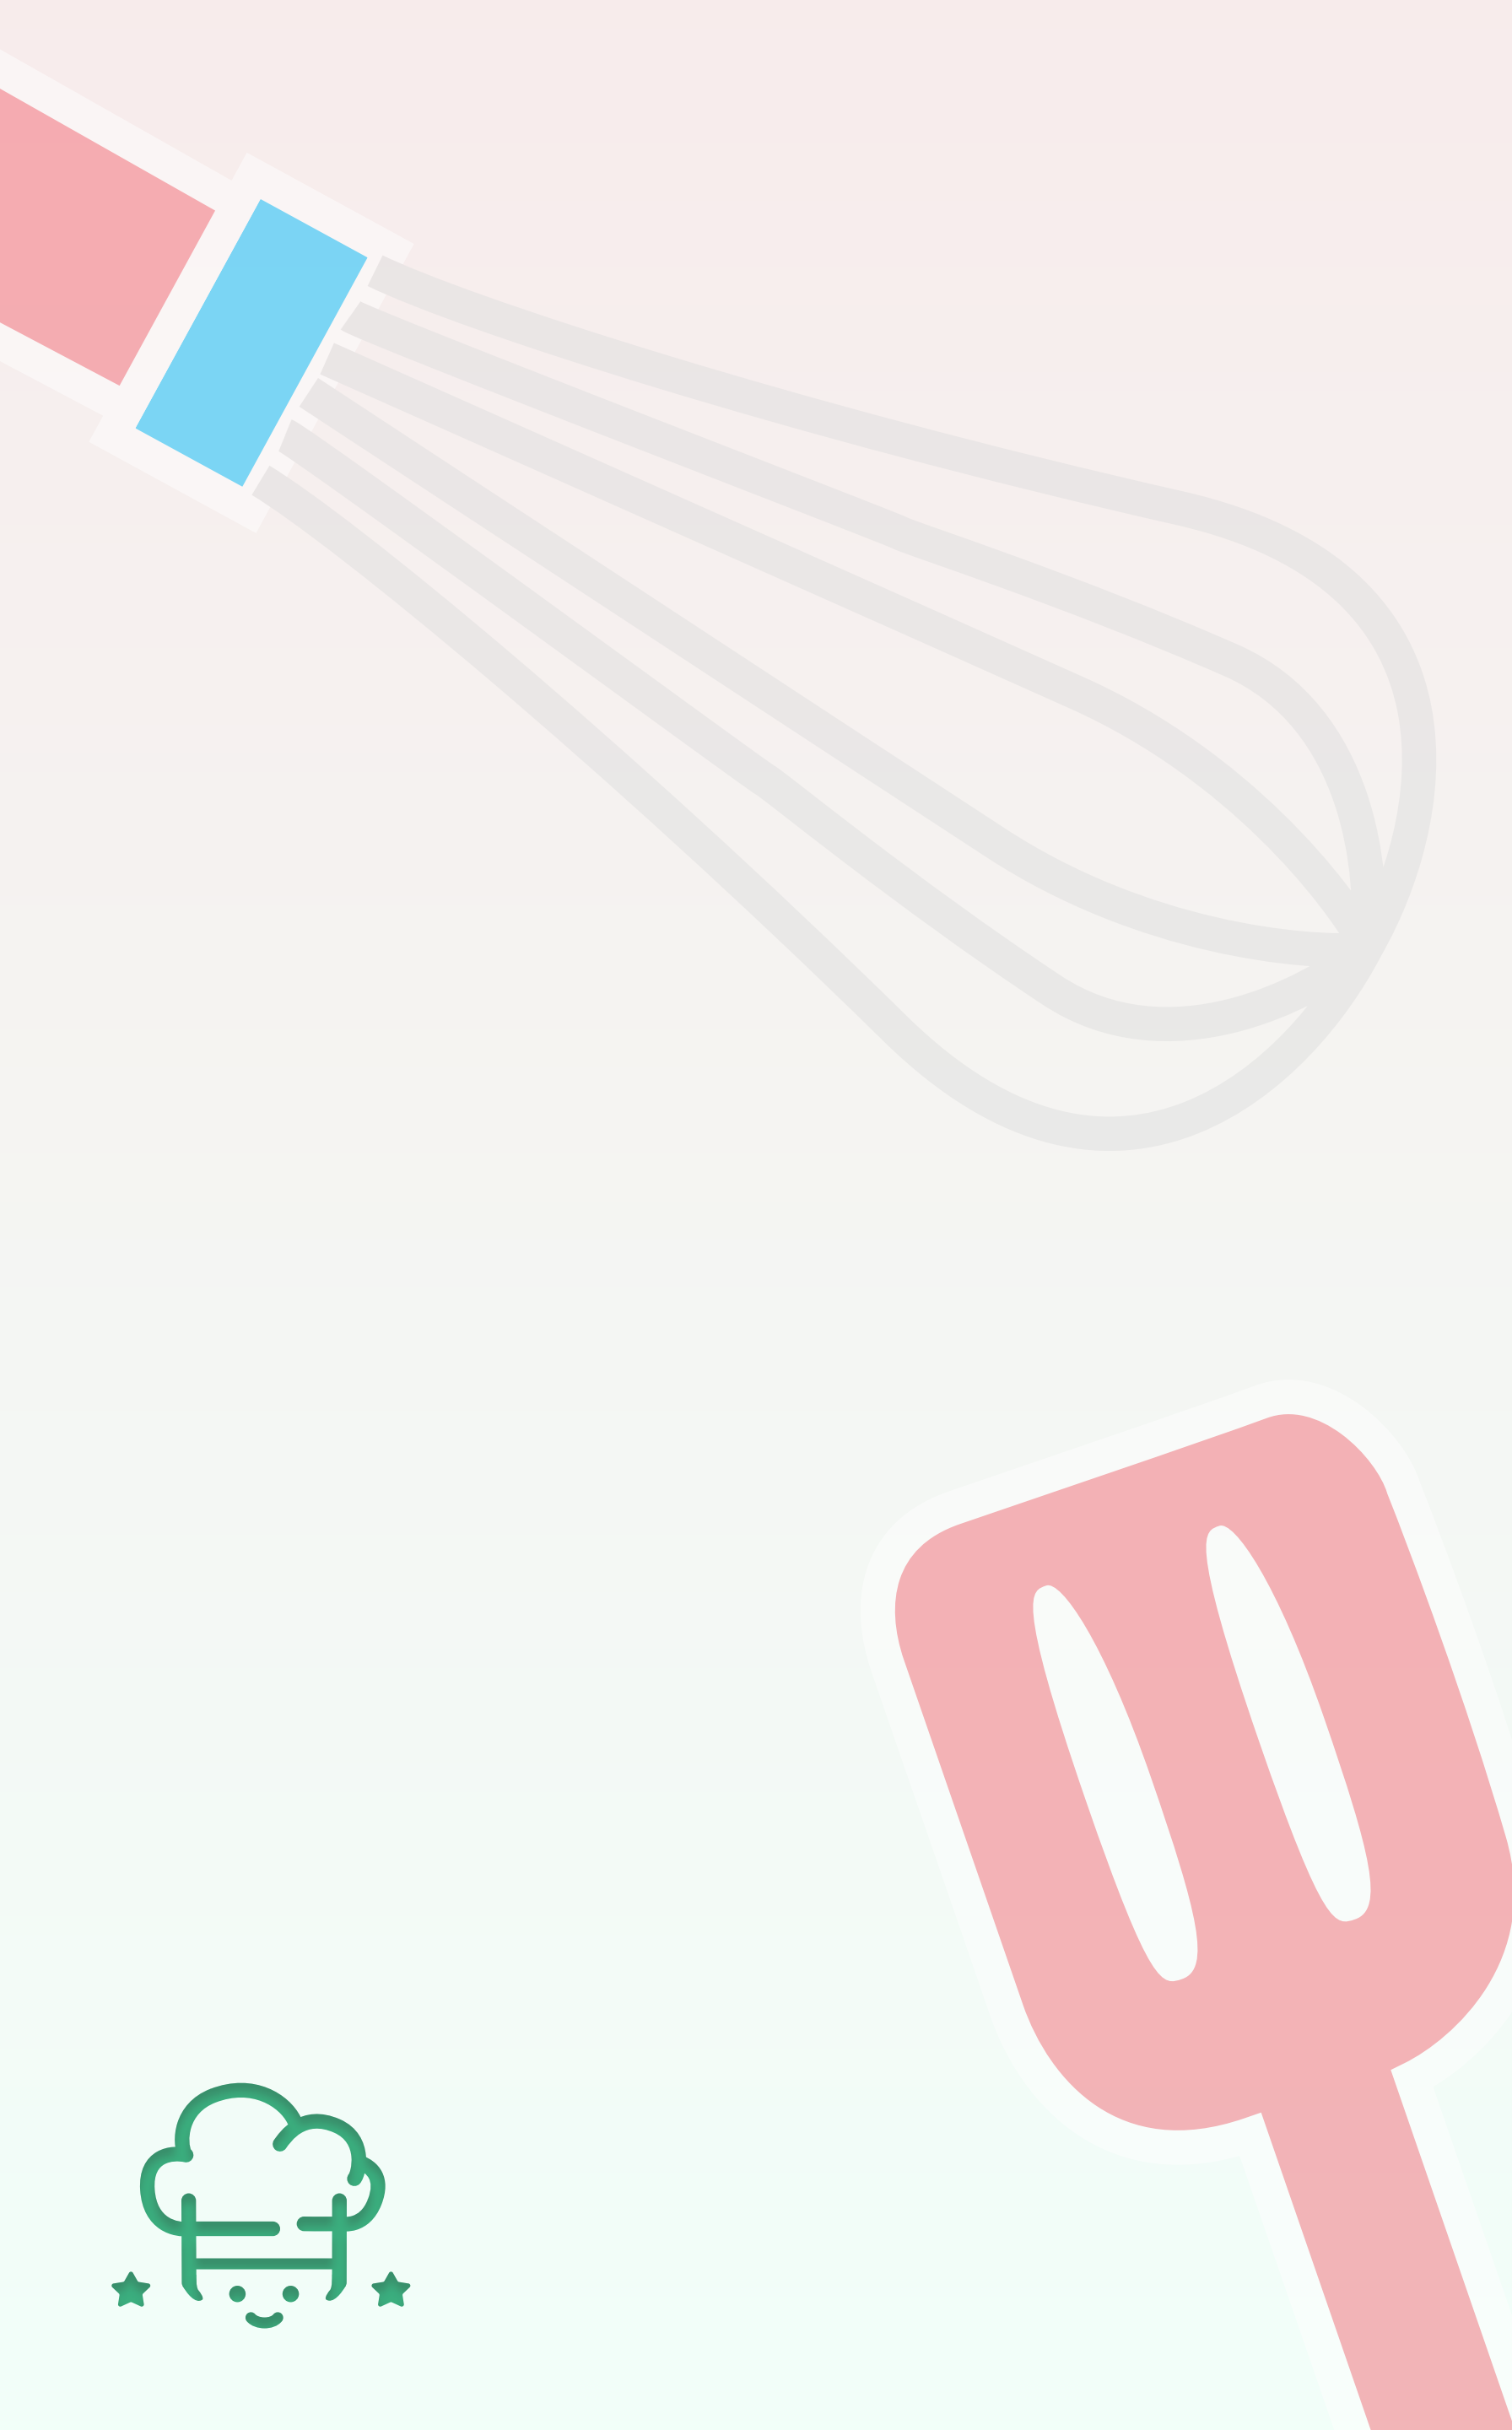

### Social media marketing

- Instagram, Tiktok, Youtube, etc.
- User generated content
- Documented cooking competitions

### On-site marketing

- University, word of mouth, and social media
- Meal ingredient discounts at partnered stores
- Cooking stations serving free recipes

## ☐ Step 3: Growth

### Feedback Loop

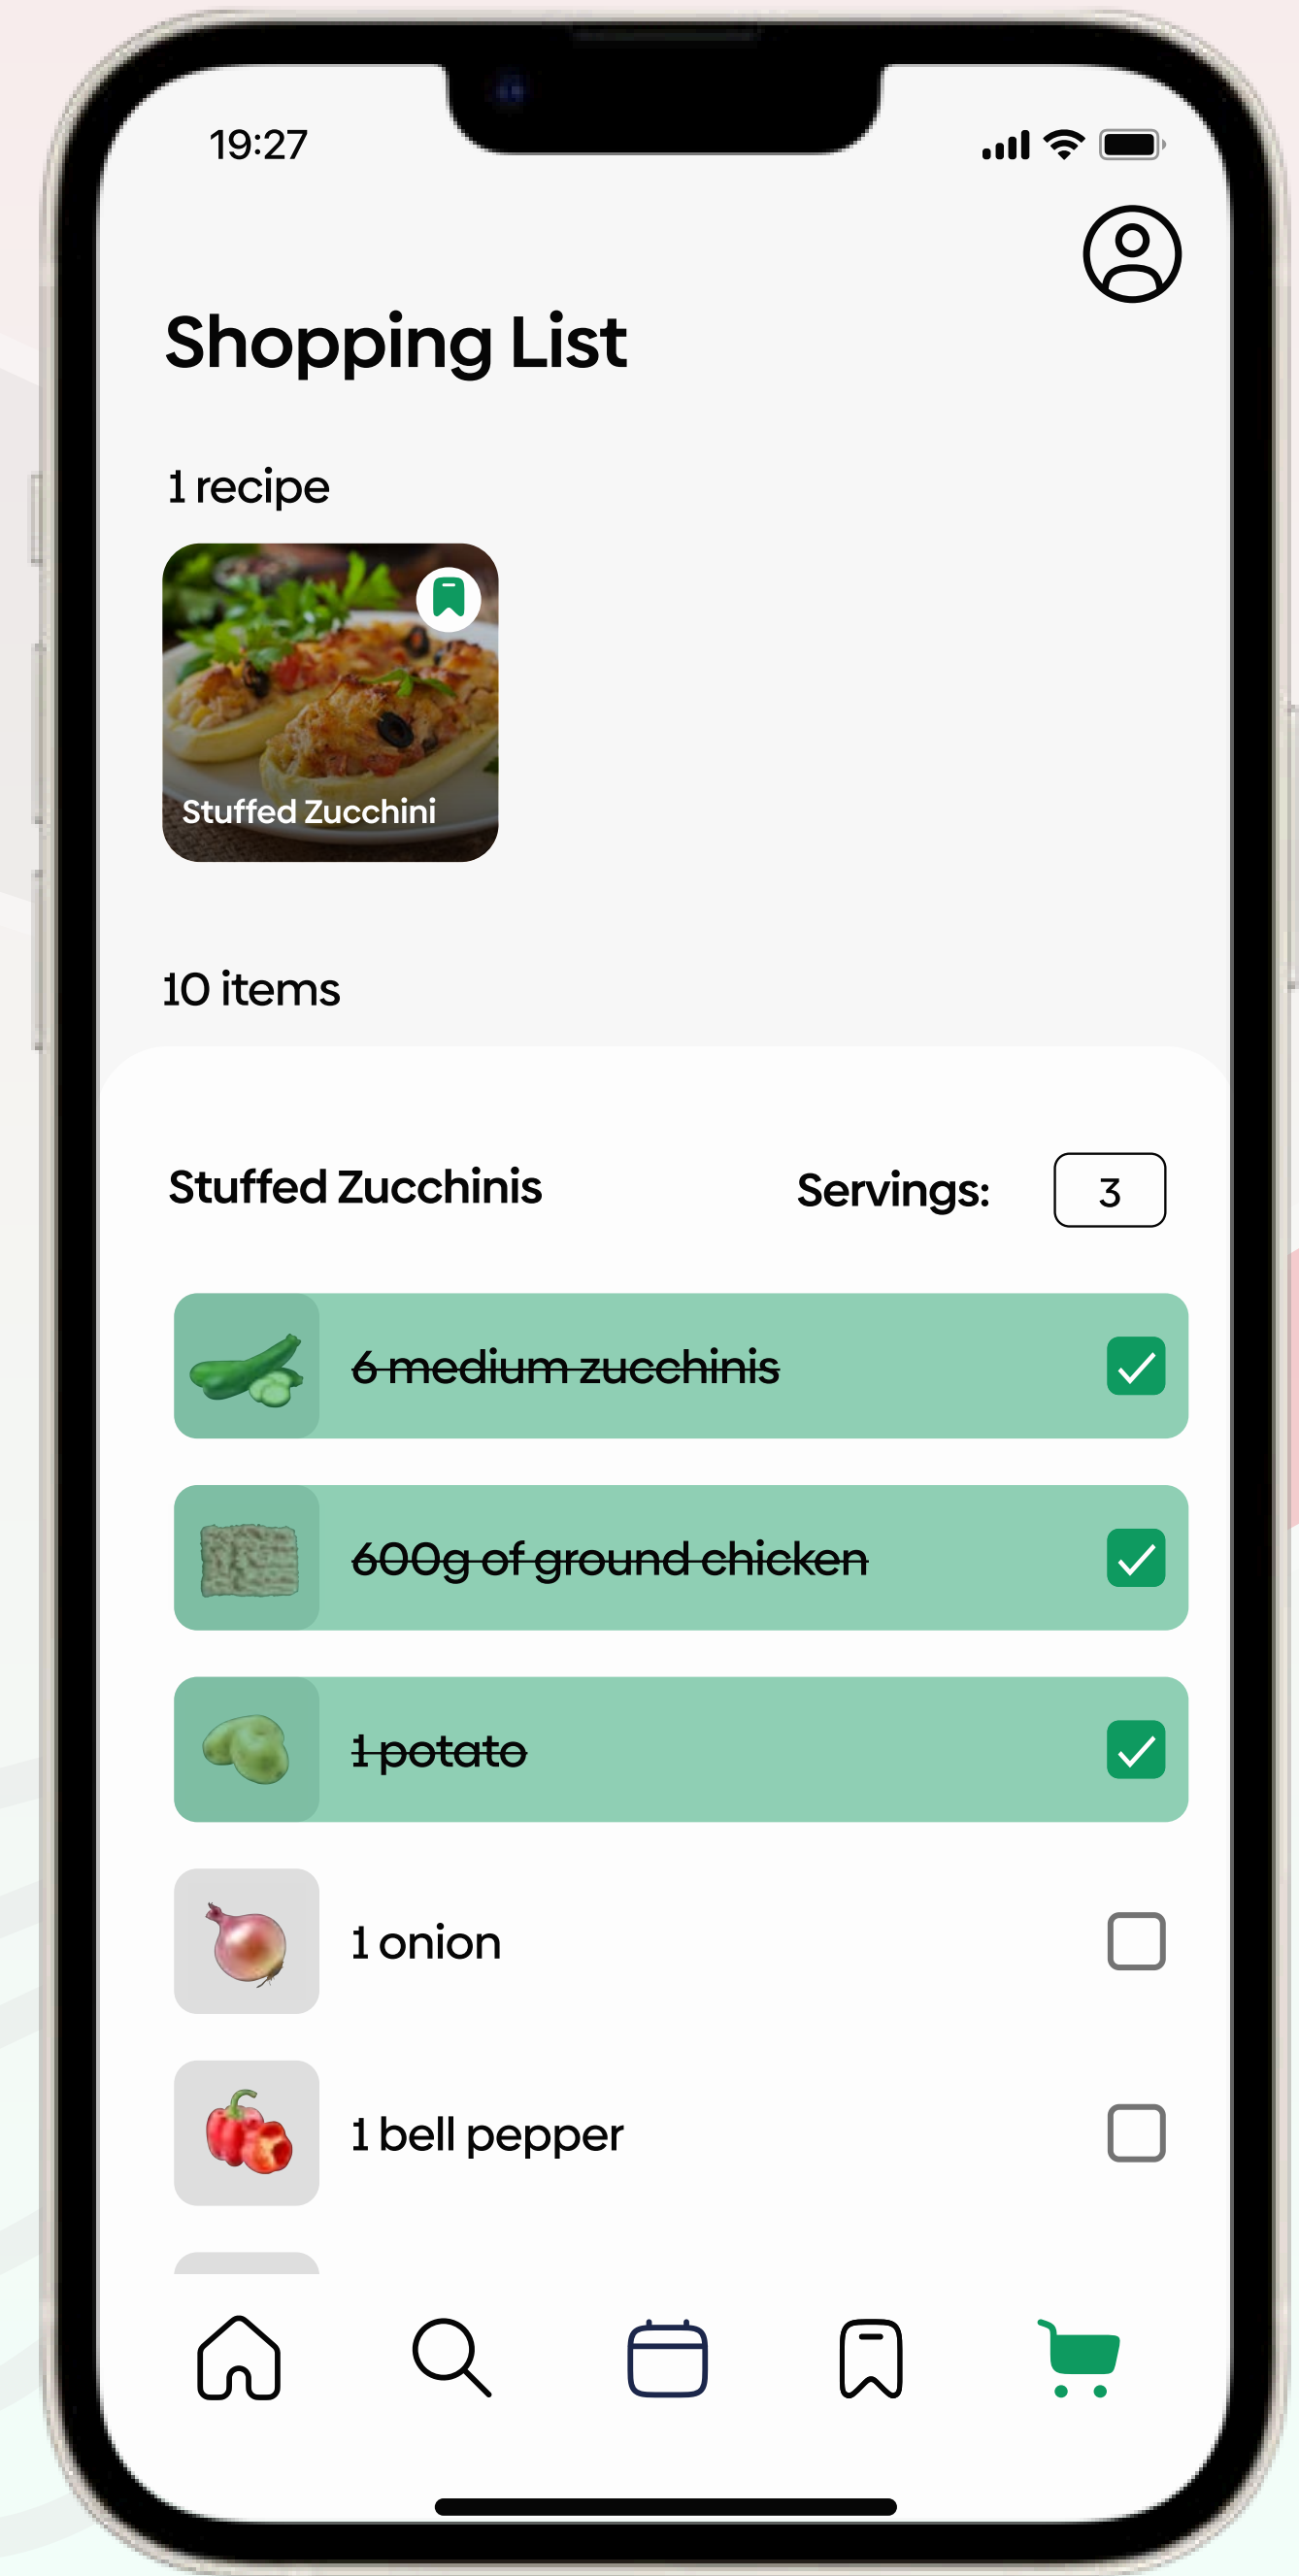

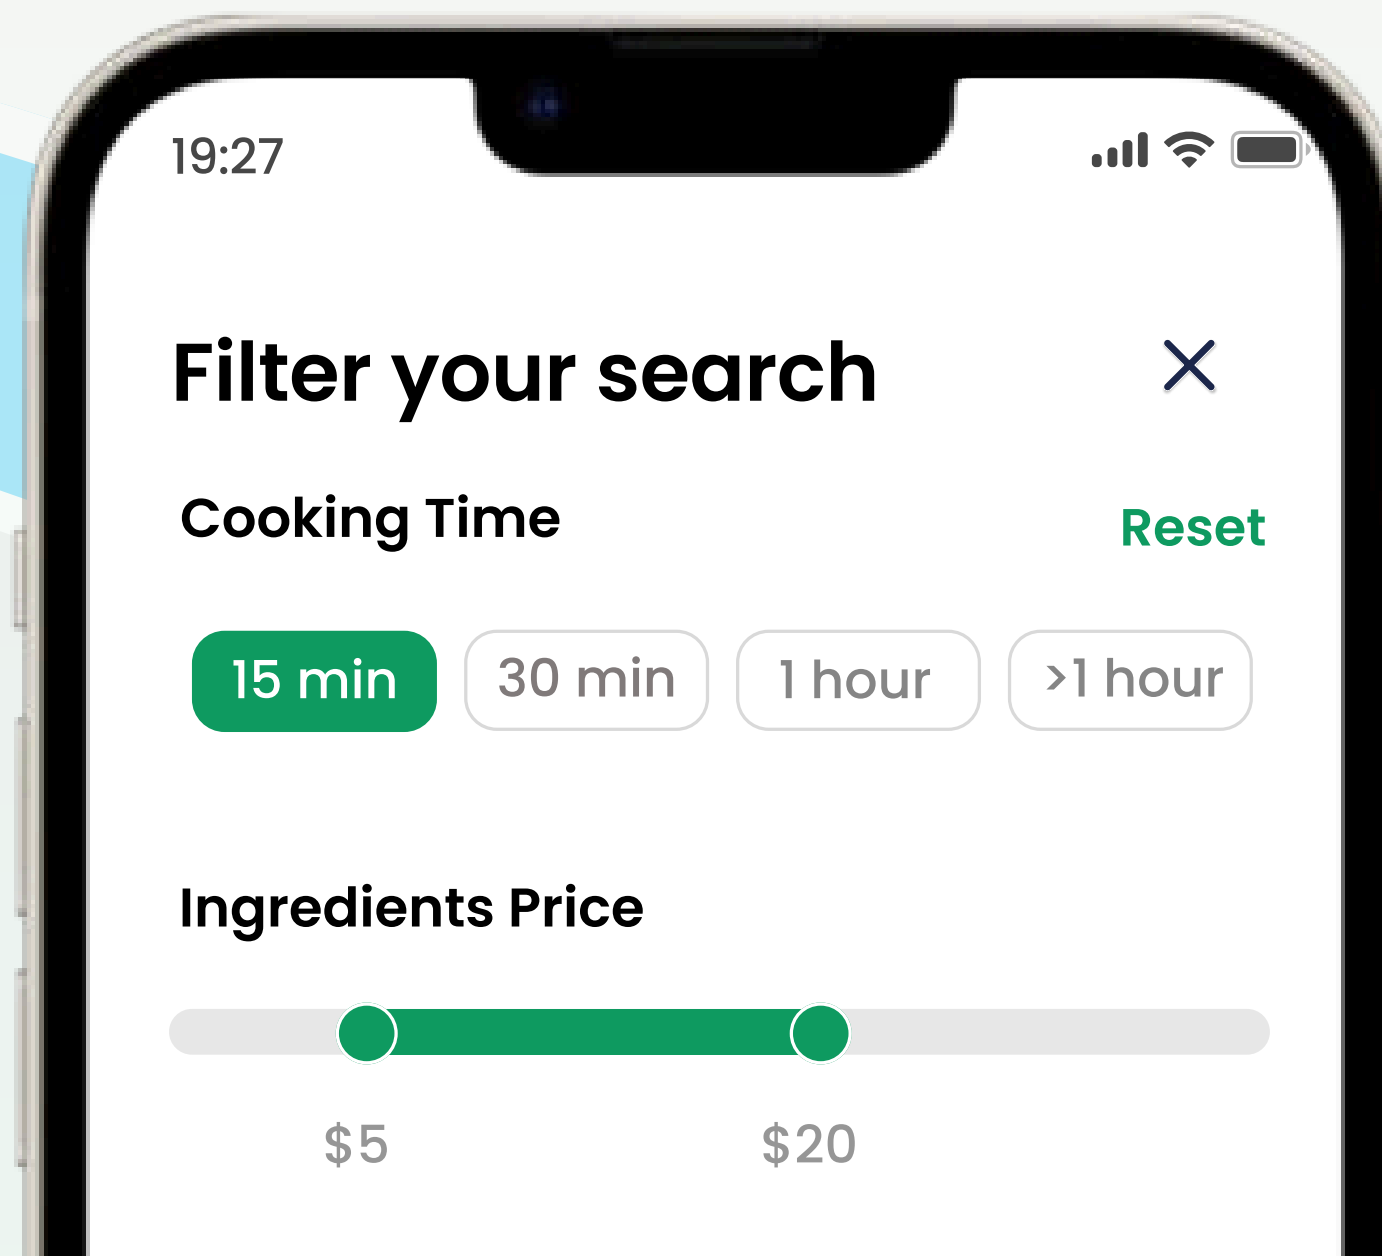

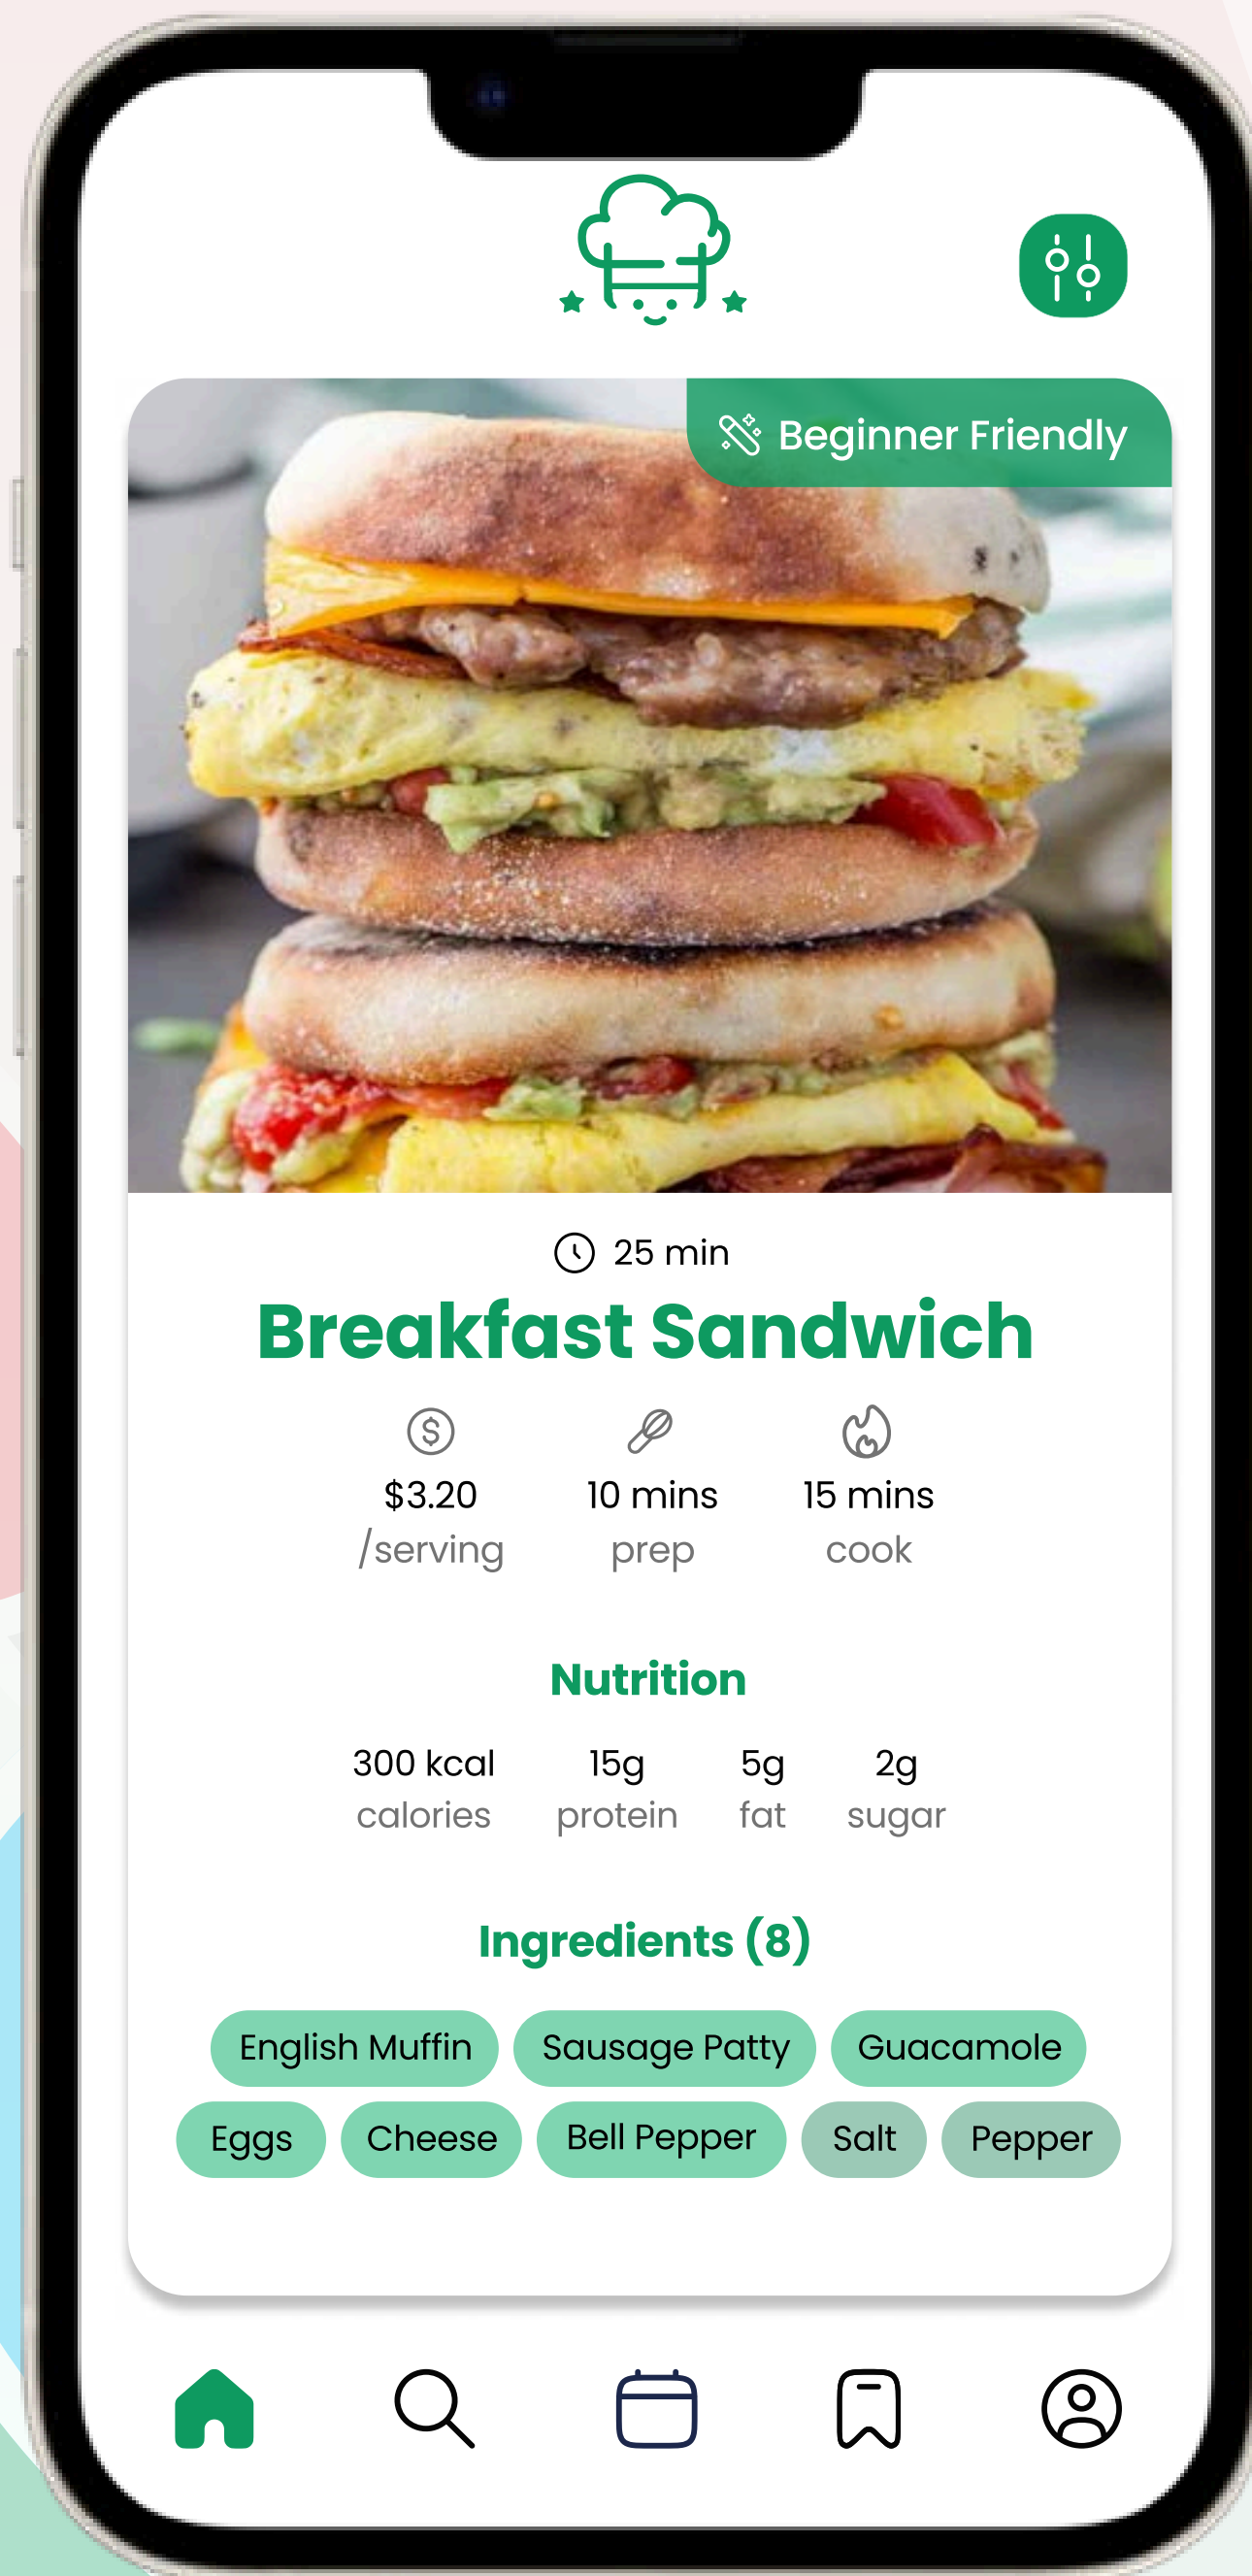

- Converted beta users
- Grow social media campaign
- Implement feedback from users
- Integrate future features

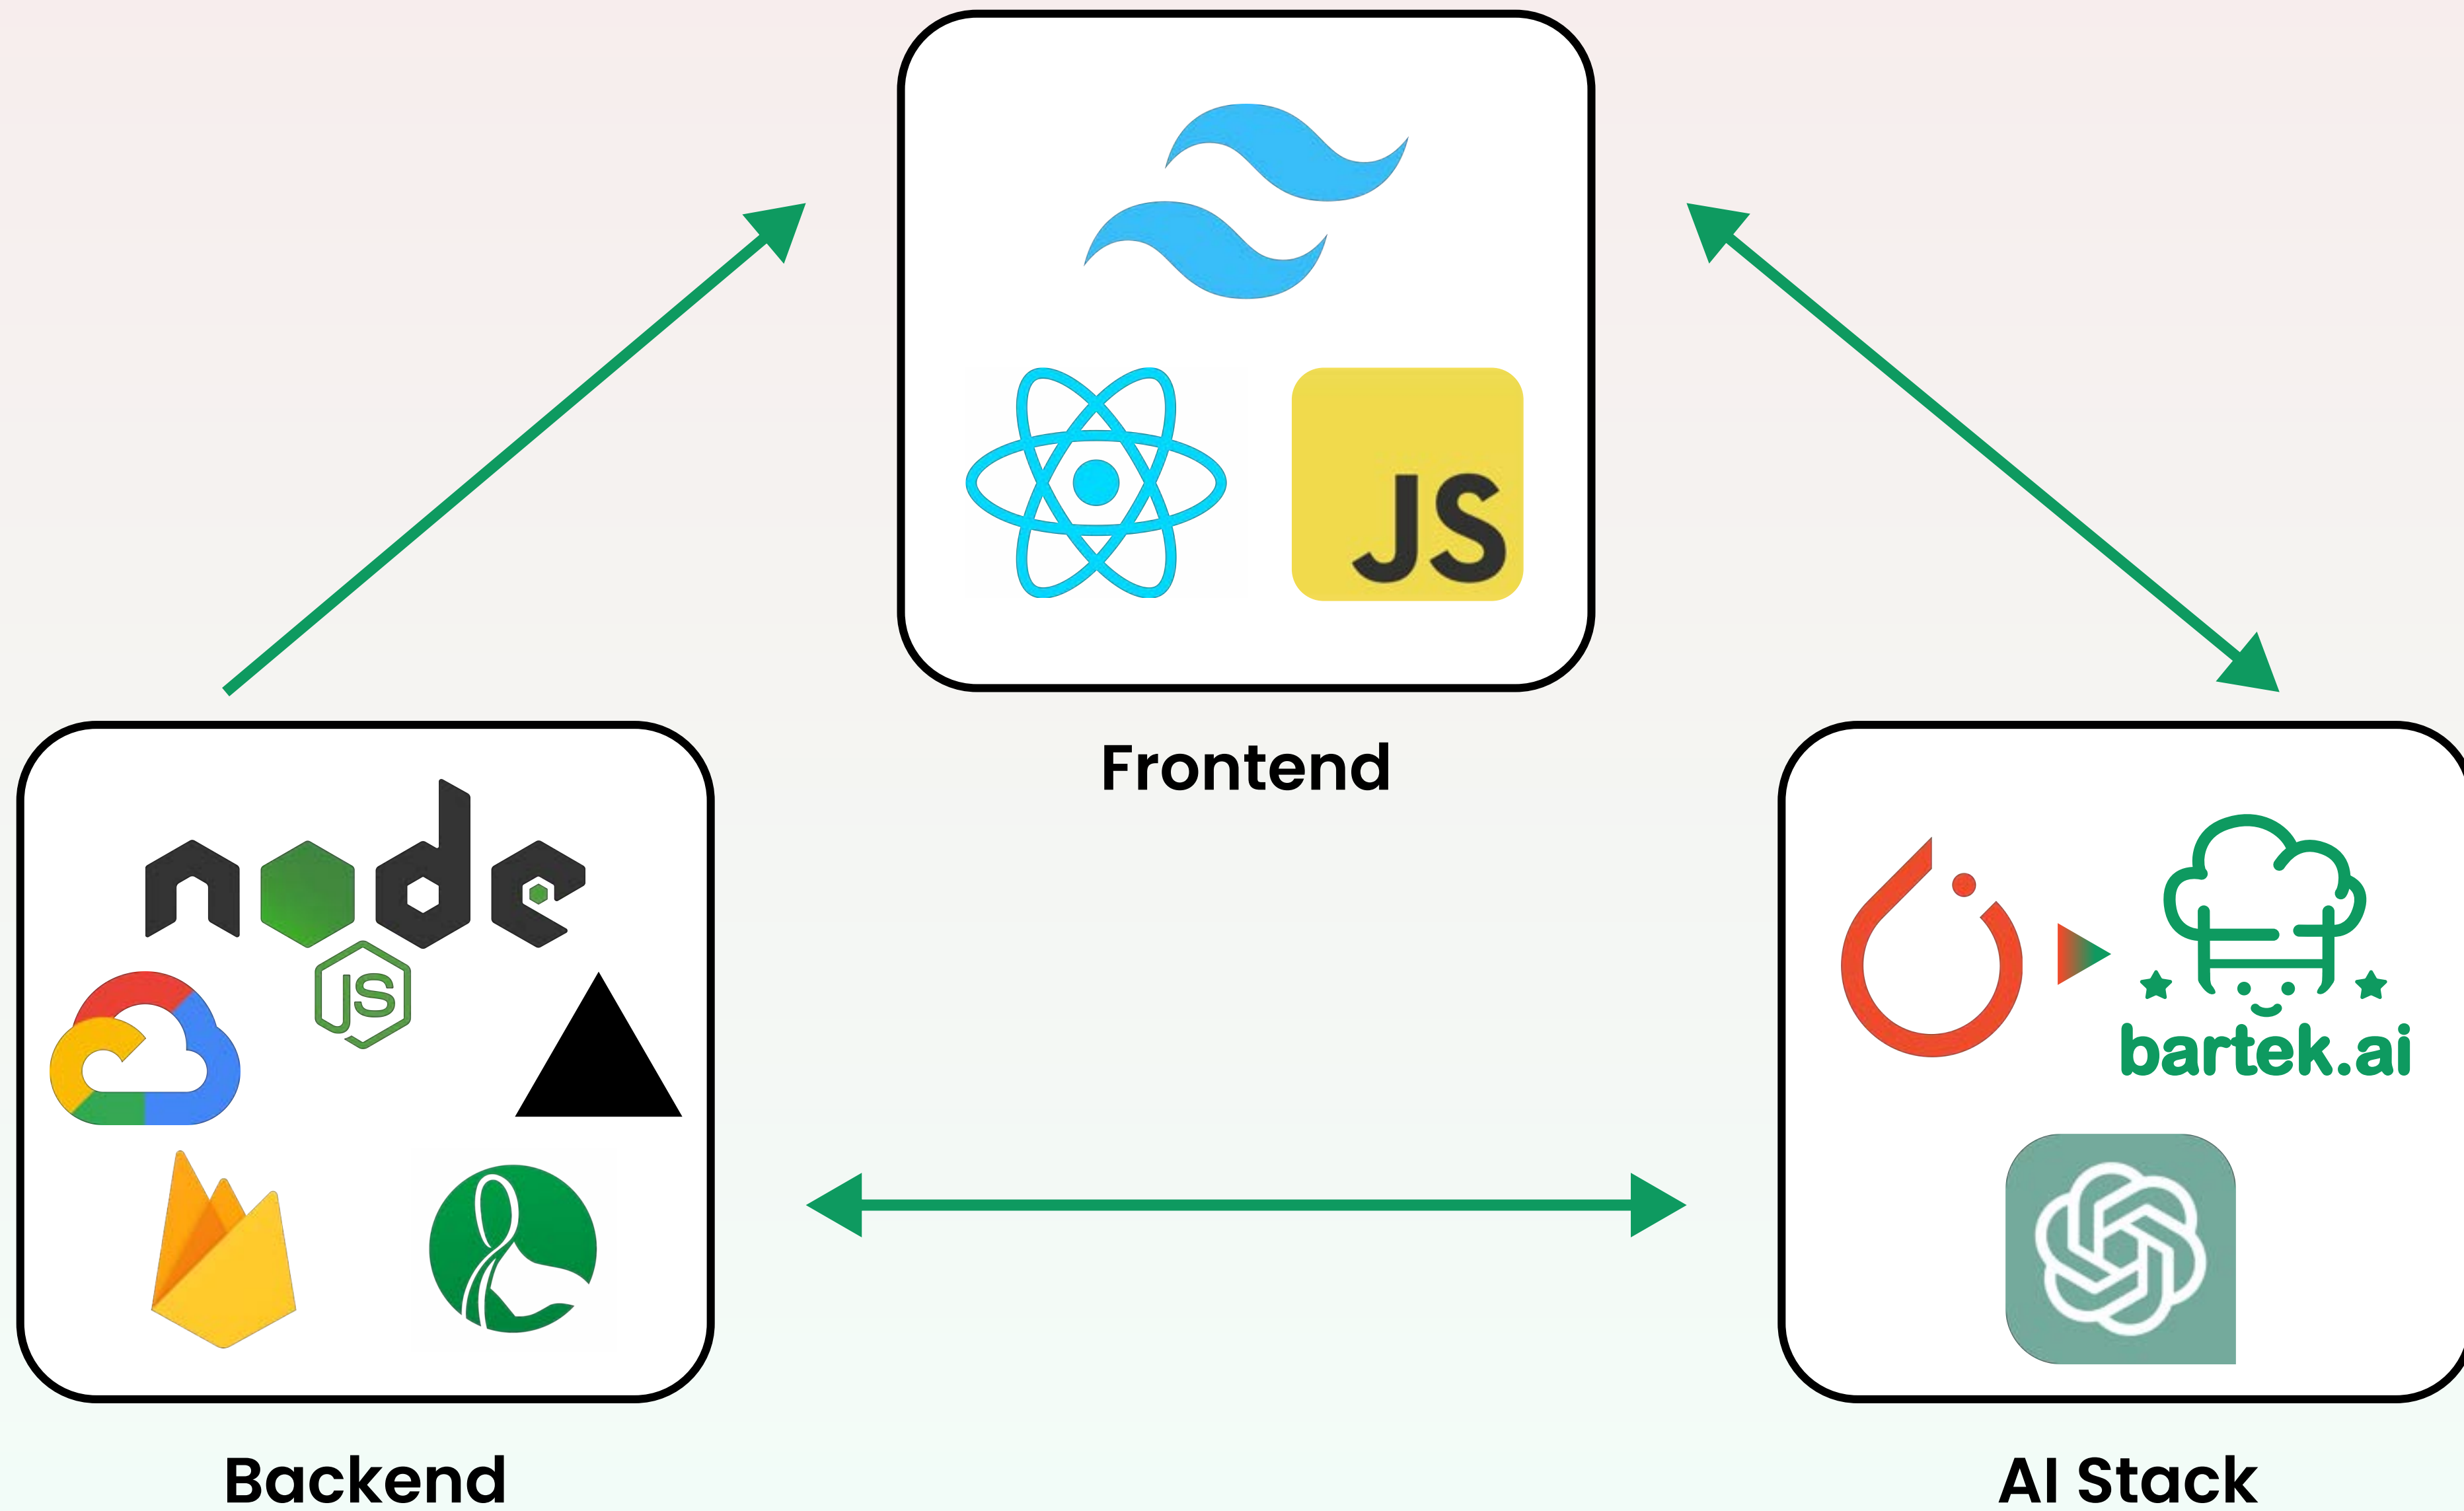

### Monetization

- Build relationships with retailers and onboard to app
- Start with smaller local retailers, then scale up

**Ingredient Delivery Integration** to unlock additional revenue streams

**Hands-free** audio walkthrough to ease the cooking process

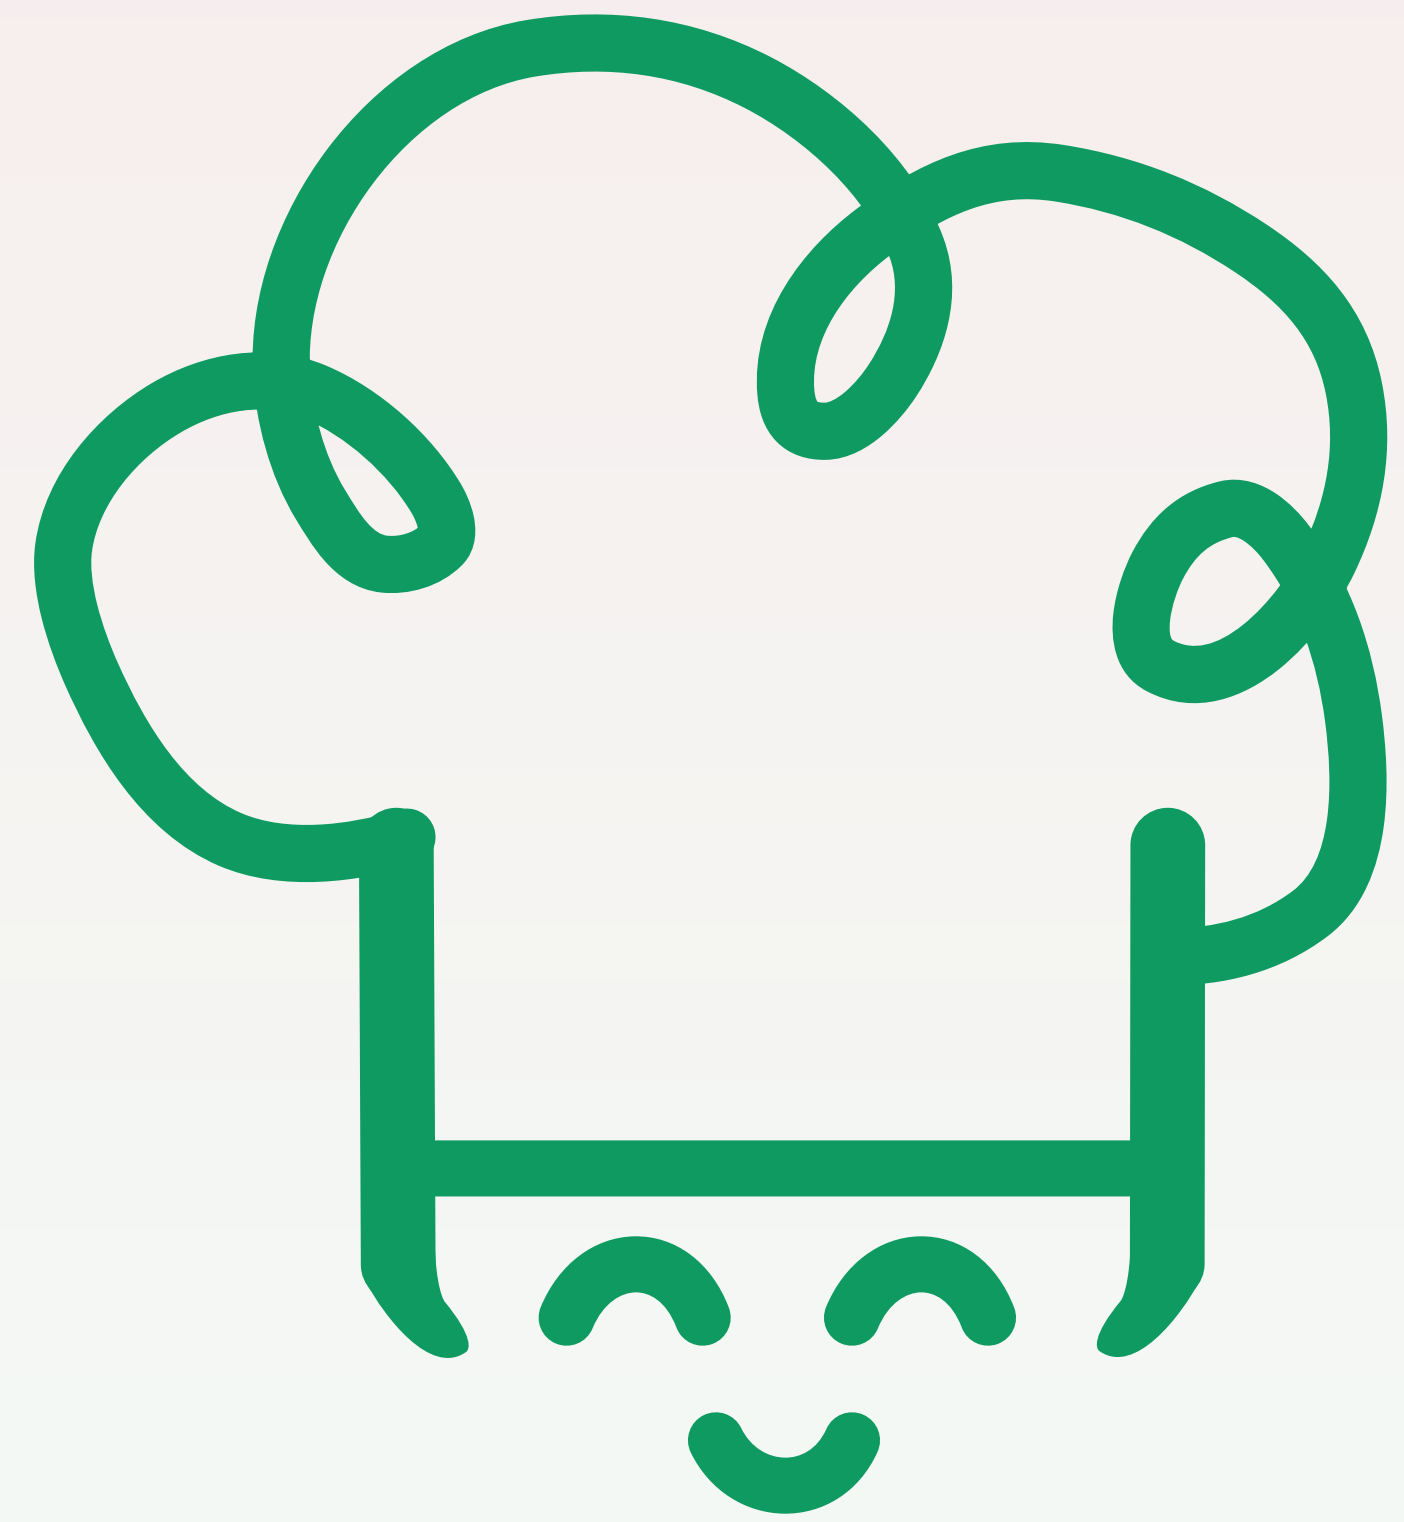

**Gameification** to build habits

**TikTok integration** to leverage trends, inspire users, and expand recipe database
